GUARANTEE

WE GUARANTEE all nursery stock we sell to be true to name; nevertheless it is mutually understood and agreed that should any stock prove untrue to name, the nursery shall refund purchase price or replace free, at the option of purchaser, and shall in no case be further responsible.

Condition governing life of stock after shipping is beyond our control, so we make no guarantee as to life of plants we sell; however, in accordance with the policy recommended by the Washington State Nurserymen's Association, replacements will be made at half-price on any items that fail to grow by July 1st following date of planting provided we are notified in writing. No adjustment considered otherwise.

SHIPPING SEASON—Our shipping season begins about December 1st and continues until spring. Where planting conditions are favorable, and if customer requests, we can make shipments in mid-winter.

Wherever possible we ship by parcel post. **PLEASE ADD 15%** to cover cost of postage. All stock will be pruned back to meet parcel post regulations. **ALL COMMERCIAL FRUIT TREE ORDERS**, shade trees and all evergreens too heavy or too large for parcel post will be shipped Auto Freight or Express **COLLECT** for shipping costs.

SALES TAX—If you live in the State of Washington, please add 4% for tax.

TABLE OF DISTANCE FOR PLANTING

Apples, standard	30 to 40 feet
Pears, standard	20 to 25 feet
Cherries, standard	30 to 40 feet
Cherries, sour	18 to 20 feet
Plums	16 to 18 feet
Peaches	16 to 20 feet
Apricots	16 to 20 feet
Apples, dwarf	8 to 12 feet
Apples, semi-dwarf	12 to 20 feet
Cherries, semi-dwarf	20 to 25 feet
Nectarines	16 to 18 feet
Quinces	12 feet
Currants	3 to 4 feet
Gooseberries	3 to 4 feet
Raspberries	3 to 4 feet
Strawberries	1½ to 3 feet
Grapes	8 to 10 feet
Blackberries	6 to 8 feet
Pear, dwarf	12 to 20 feet
Peach, dwarf	12 to 20 feet

RULE—To estimate the number of plants required for an acre at any given distance, multiply the distance between the rows by the distance between plants, which will give the number of square feet allotted each plant, and divide the number of square feet in an acre (43,560) by this number and the quotient will be the number of plants required.

Prices for all Varieties of STANDARD FRUIT TREES

	1-9 (each)	19-49 (each)	50-299 (each)	300 up (each)
1 year	1.95	1.60	1.05	1.00

✓ **Gravenstein**—Large; striped; tender and juicy with high flavor.

✓ **King**—Very large; yellow splashed with crimson; excellent dessert apple.

✓ **Red Gravenstein**—Solid red strain of Gravenstein.

✓ **Snow**—Tender skinned; medium size; flesh white streaked red; aromatic.

WINTER VARIETIES

✓ **Golden Delicious**—Excellent dessert and cooker, wonderful flavor; rich golden color; good pollenizer.

✓ **Northern Spy**—Tender, mild and juicy; keep 'til June; large; red striped.

✓ **Red Delicious**—New, double red, improved Delicious; more adaptable to Western Washington.

✓ **Red Rome**—Large and good color; flesh yellowish and juicy; wonderful keeper.

✓ **Red Winesap**—Tart, crisp; fine for eating; prolific bearer.

✓ **Winter Banana**—Large, clear waxy yellow with blush; good cooker.

Also many other varieties available.

STANDARD APPLE COMBINATIONS

These trees are ideal for the smaller garden. Generally include a summer variety, a fall variety and one or two winter varieties.

	2 year	3 year	4 year
2-way	3.50 (2 for 6.50)	4.50 (2 for 8.50)	5.50 (2 for 10.50)
3-way	4.00 (2 for 7.50)	5.00 (2 for 9.50)	6.00 (2 for 11.50)
4-way	4.50 (2 for 8.50)	5.50 (2 for 10.50)	6.50 (2 for 12.50)

Apricots

✓ **Earliril**—NEW, medium size and early.

✓ **Jannes**—Developed in Western Washington; very large, delicious.

✓ **Perfection**—Moderately early; large fruit; flesh yellow-orange.

✓ **Tilton**—Hardy, juicy, good canner.

✓ **Wenatchee Moorpark**—Heavy bearer; good color.

Cherries, Sweet

✓ **Bing**—Deep dark red, nearly black; meat firm, sweet; requires pollenization.

✓ **Black Republican**—Medium, black; good pollenizer.

✓ **Black Tartarian**—Large, purplish black pollenizer.

✓ **Lambert**—Large heart-shaped; firm flesh, rich sweet flavor; needs pollenizer.

✓ **Royal Ann**—Light yellow with red checks; large, handsome fruit; require pollenizer.

✓ **Sam**—NEW, large, black similar to Lambert; excellent pollenizer.

✓ **Van**—Similar to Bing, and a certified pollenizer; very hardy.

Cherries, Sour

- ✓ **Late Duke**—Large, dark red, juicy and rich; very productive.
- ✓ **English Morello**—Medium, dark red, acid.
- ✓ **Minnesota Meteor**—Leaves resistant to leaf spot; large, light red.
- ✓ **Montmorency**—Rich red, juicy; canner.

Crabapples

- ✓ **Dolga**—Highly colored, deep red fruit fine for jelly; good ornamental tree.
- ✓ **Hyslop**—Brilliant dark red, flesh yellow tinged red, firm and juicy.
- ✓ **Transcendent**—Large, red and yellow striped; good eating and cooking.
- ✓ **Whitney**—Best dessert crab; large, light yellow, red striped, crisp and juicy.

Nectarines

- ✓ **Boston**—Large, handsome fruit, aromatic and distinctive flavor.

Peaches

- ✓ **Boyce**—Yellow, red blush; deep yellow meat, firm and sweet; Western Wash. variety.
- ✓ **Early Elberta**—Large, golden yellow, excellent quality; good shipper.
- ✓ **Golden Jubilee**—Freestone; excellent canner, early ripener.
- ✓ **Improved Rochester**—An improved strain of reliable Rochester.
- ✓ **J. H. Hale**—Large; ranks high as a commercial variety.
- ✓ **Pacific Gold**—(Trade Mark Registered)—One of the finest peaches on the market; developed especially for Western Washington; tree hardy and prolific; fruit golden yellow marked with red.
- ✓ **Redglobe**—Red peach with very firm texture. NEW.
- ✓ **Red Haven**—Golden flesh, fine grained, highly flavored; colors to brilliant red.
- ✓ **Rochester**—Very hardy, medium size; excellent quality.
- ✓ **Shoaf**—Another Western Washington variety; freestone; good dessert and canner.
- ✓ **Veteran**—Particularly adaptable to Western Washington; very uniform; high quality for canning.

Pears

- ✓ **Bartlett**—Large clear yellow; juicy, buttery, for dessert, canning and cooking.
- ✓ **B. d'Anjou**—Winter pear, buttery and melting with sprightly flavor. Good pollenizer for Bartlett. Very productive.
- ✓ **Bosc**—One of the best Fall pears. Long, slender; solid russet color, fine-grained and flavorful.
- ✓ **Clapp's Favorite**—Similar to Bartlett, without graininess; large.
- ✓ **Comice**—Good commercial variety; faint reddish blush, juicy and sweet.
- ✓ **Flemish Beauty**—Large, white flesh, excellent pollenizer.
- ✓ **Red Bartlett**—Same as Bartlett, but with red skin.

Plums and Prunes

✓ **Blue Damson**—Small, roundish oval; dark purple; fine canner.

✓ **Bradshaw**—Dark violet red with yellowish green fruit; late bloomer.

✓ **Burbank**—Large, cherry red, very sweet. Early bearer.

✓ **Columbia**—Dark, purplish red with golden flesh; productive.

✓ **Date**—Sweet, reddish purple; larger than French Petite.

✓ **Early Italian**—Slightly larger and two weeks earlier than Italian.

✓ **French**—Medium fine texture; sweet, excellent for drying.

✓ **Green Gage**—Fruit large, greenish yellow, excellent flavor.

✓ **Imperial Gage**—Greenish yellow tinged red; juicy, tender, sweet.

✓ **Italian**—Medium; purplish black color; leading variety.

✓ **Peach**—Light red skin; large, round, good for home garden.

✓ **Santa Rosa**—Best of Japanese plums. Reddish purple; good bearer.

✓ **Satsuma**—Blood red flesh; pleasant and juicy.

✓ **Yellow Egg**—Large, egg-shaped, yellow; good canner.

Prices for all Varieties of DWARF AND SEMI-DWARF FRUIT TREES

When fully grown the maximum height of the Dwarf tree is not over 10-12 feet, and is ideal for the small family and small plot. The semi-dwarf tree grows to 15-20' and is easy to spray, prune and harvest and bears a bountiful crop. Most varieties available in standard size trees are also available in dwarfs or semi-dwarfs. All cherries are semi-dwarfs, rather than dwarf.

	1-9 each	10-49 each	50-299 each
1 year light	2.50	2.10	1.40
2 year light	3.25	2.75	1.85

CEDAR

CEDRUS ATLANTICA GLAUCA—

Slow growing, twisted branches
covered with tufts of steel blue
needles

30-36"	7.00
3-4'	8.00
4-5	10.50

CEDRUS DEODARA—Fast growing. Openly spaced, sweeping graceful branches.

30-36"	5.75
3-4'	7.00
4-5	9.00

CYPRESS

ALUMI (Blue)—Pyramidal, symmetrical with broad base

3-4'	6.25
4-5	8.00
5-6	11.50
6-8	13.50

AZUREA —Bluer and slower growing than Alumi	18-24"	4.50
	24-30	5.00
BIRDSNEST (Nestoides) —Low spreading, rich green, fern-like, almost flat on top		
BIRDSNEST (Nidifera) —Same, but branches slightly upright		
BIRDSNEST (Nidifera) Silver —Same, but silver marked branches	12-15"	4.50
	15-18	5.25
	18-24	5.75
CRIPPSI —Bright green, irregular and spreading	18-24	5.50
	24-30	6.50
CRYPTOMERIA —Dense foliage, growing to a picturesque tree	8-10"	3.50
	10-12	4.25
CYANO VIRIDIS —Compact, blue mound; dwarf	15-18"	6.00
	18-24	7.00
	24-30	8.00
ELWOODI —Blue, upright, dwarf	24-30"	5.25
	30-36	6.25
	3-4'	7.50
OBTUSA —Irregular, green	24-30"	7.50
	30-36	9.00
	3-4'	12.50
OBTUSA GOLDEN — Same as Obtusa, golden branches	24-30"	8.50
	30-36	10.00
	3-4'	13.50
PLUMOSA —Upright, soft feathery foliage	30-36"	5.25
	3-4'	6.00
PLUMOSA AUREA —Same type, golden color	15-18"	3.50
	18-24	4.00
	24-30	4.75
	30-36	5.75
STEWARTI —(Golden Lawson) Erect habit, good winter color	24-30"	5.50
	30-36	6.50
	3-4'	8.00
SULPHURA NANA —Low, slow growing, globular, golden	12-15"	3.50
	15-18	4.25
	18-24	5.25
THREADLEAF (Filifera) —Semi-dwarf, green thread-like branches, soft and drooping	18-24"	5.00
	30-36	7.00
	3-4'	7.75
THREADLEAF SEMI-GOLD —Dwarf, gold tips and markings	12-15"	3.75
	15-18	4.25
	18-24	5.25
WESTERMAN —Yellow foliage, forms pyramid	18-24"	5.00
	24-30	6.00
	3-4'	7.50
WISSEL —Columnar, very dark green	30-36"	6.50
	3-4'	8.00
	4-5	10.50

FIR**ABIES CONCOLOR (White Fir)—**

Symmetrical, bluish foliage

24-30"	6.25
30-36	7.75
3-4'	9.50

ALPINE—(Abies Lasiocarpa) True native, smaller growing

12-15"	3.00
15-18	4.00
18-24	5.00

NOBLE—(Abies Nobilis) True native, flat symmetrical branches, stiff to the tips

12-15"	3.00
15-18	4.00
18-24	5.00

JUNIPER**ANDORRA**—Creeping, grayish-green summer, pinkish Fall and winter

12-15"	4.25
15-18	5.25
18-24	6.50

GLAUCA HETZI—Upright, spreading, blue-green

18-24"	5.00
24-30	5.75

IRISH—Narrow columnar, rich blue-green

30-36"	4.50
3-4'	5.50
4-5	7.00

IRISH DWARF—Same, smaller growing

12-15"	4.00
15-18	5.00
18-24	6.00

MEYER—Deep blue, semi-dwarf, irregular habit, semi-spreading

12-15"	4.25
15-18	5.25
18-24	6.25

PFITZER—Spreading, rapid grower, gray-green

18-24"	5.25
24-30	6.25
30-36	7.75

PFITZER COMPACTA—Same as Pfitzer, but more compact

12-15"	4.50
15-18	5.25
18-24	6.25

PFITZER GOLD TIP—Same as Pfitzer, golden tips and branchlets

12-15"	4.50
15-18	5.25
18-24	6.25

SAVIN—More upright, finer foliage than Pfitzer, dark green

12-15"	3.75
15-18	4.50
18-24	5.25

SPINY GREEK—Low pyramidal, silvery-blue needles

18-24"	5.75
24-30	6.50
30-36	7.50

TAMARISCIFOLIA—Dark blue-green, compact and symmetrical

12-15"	4.25
15-18	5.25
18-24	6.50

TORULOSA—Narrow columnar, twisting branches, scale-like leaves

24-30"	6.50
3-4'	8.50

PINE

AUSTRIAN—Slow growing, dark green, coarse foliage

BRISTLECONE—Short stout branches, slow growing, long live

CONTORTA—(Lodgepole) Very symmetrical, narrow crowned; when exposed to coastal winds becomes contorted.

JAPANESE BLACK—Similar to Austrian; fewer, larger cone scales

SCOTCH (Sylvestrus)—Fairly rapid-growing, cone-shaped tree, long needles

JAPANESE RED (Densiflora)—Bright green 2-5" needles

30-36"	7.00
3-4'	7.50
4-5	8.50
5-6	9.50

MUGHO—Dwarf, compact, shrubby and symmetrical

12-15"	5.00
15-18	6.25
18-24	7.50

SPRUCE

ALBERTINA—True pyramid, very dwarf, gray green foliage

15-18"	5.50
18-24	6.75
24-30	8.00
30-36	11.50

COLORADO BLUE-GREEN—Horizontal branches, close-set bluish green needles

18-24"	6.50
24-30	7.50
30-36	8.50
3-4'	9.50

COLORADO GREEN—Same, green needles

18-24"	5.00
24-30	6.00
30-36	7.00
3-4'	8.00

KOSTER'S BLUE—Grafted, specimen trees, very blue

18-24"	10.50
24-30	12.50
30-36	15.50

NEST—Dwarf, very compact, dark green

9-12"	4.00
12-15	5.25
15-18	6.25

NORWAY—Conical, deep green, rapid growing

3-4'	7.00
4-5	8.50
5-6	9.50

YEW

BACCATA (English Golden)—Bright gold on tips and margins

18-24"	5.00
24-30	6.00
30-36	7.00

CUSPIDATA (Japanese)—Dark green, vigorous, hardy

15-18"	6.00
18-24	7.25
24-30	8.50

HATFIELD—Vigorous, compact and conical

24-30"	6.50
30-36	7.50
3-4'	9.00

HICKS—Narrow columnar	30-36"	7.00
	3-4'	9.00
	4-5	10.50
IRISH—Vertical, dark green, brilliant red berries	3-3½'	7.50
	3½-4	8.50
	4-4½	9.50
GOLDEN IRISH—Golden variegations (same price as green)		
REPANDENS—Low, spreading, dark green	15-18"	6.75
	18-24	8.00
	24-30	9.25

NON-PATENTED CLIMBERS

Etoile de Hollande, red
Blaze, red
Paul's Scarlet, red
Cecile Brunner, pink
Dr. J. H. Nicholas, pink
New Dawn, pink
Talisman, yellow and copper
Doubloons, saffron yellow
Ruth Alexander, orange

Planting Instructions

GENERAL

DO NOT use commercial fertilizer or barn yard manure in such a manner that it comes in contact with roots.

DO NOT expose roots to air.

It is beneficial to the trees or plants to immerse the roots in water before planting. **Many failures of newly transplanted stock are due to lack of proper pruning.** Follow pruning instructions given for each class of nursery stock. **The holes, for planting must be large enough to receive the roots freely without bending them from their natural position.** All broken or mutilated portions of the roots should be cut off so as to leave the ends smooth. All trees and plants should be planted two inches deeper than they stood in the nursery row; pack the soil firmly about the roots by tramping with the feet, being careful not to bark or break the roots. Leave three inches of surface soil loose to serve as a mulch. If the ground is very dry, apply one or two pails of water before this soil mulch is in place and after the water has soaked away it can then be placed over the moist soil.

FRUIT TREES. Follow general planting instructions.

Branched. Select three or four of the best side branches, well-spaced so as to balance the tree. Prune these back one-third and cut off all other branches close to the trunk.

Whips (without branches). Trees having no side branches, cut off top just above a bud 24 to 36 inches from the ground.

SHADE TREES. Follow general planting instructions. Shade trees having a heavy top, at least one-third of the top area should be removed. Prune to avoid crowding the branches. Cut out some of the smaller branches and shorten back the side branches, but **do not cut off the leader or main stem.**

ROSES. Follow general planting instructions. Be sure that the bud is two inches below the ground. If the soil is dry, it is well to plant the rose solidly, then wet thoroughly and after the water has soaked away, throw up a small mound of earth five or six inches high around the plant. Then cut off the branches one inch above the mound, leaving it this way for ten days or two weeks, or until the buds start and show a desire to grow, when the dirt mound can be raked down. Roses handled in this manner seldom fail to make a good start and a very satisfactory growth.

RASPBERRIES, BLACKBERRIES, YOUNG-BERRIES, LOGANBERRIES, BOYSENBERRIES and DEWBERRIES. Follow general planting in-

Planting Instructions

structions. Cut back tops within six inches of the ground.

BLUEBERRIES, CURRANTS and GOOSEBERRIES. Follow general planting instructions. These plants require no pruning until shoots begin to crowd, after several years.

STRAWBERRIES. Dip roots in water and plant immediately then irrigate or pour a pint of water around each plant. Plants are easier to handle if roots are sheared off a little, leaving them about four inches long.

GRAPE VINES. Follow general planting instructions. Prune back to one cane and cut this cane back to two or three buds.

PRIVET for hedges. Follow general planting instructions. Prune back to six to ten inches above the ground.

EVERGREENS and BROADLEAF EVERGREENS. These plants are dug with a ball of earth and wrapped in burlap. Dig the hole about six inches wider than necessary to receive the ball of earth; however they should not be planted any deeper than they stood in the nursery. Half fill the hole with good rich top-soil. Pour in enough water to fill the hole so that it will wash the dirt solidly around the base of the ball. Straighten the plant up; cut the wrapping around the top of the ball, and fill in remainder of hole with dry soil, tramping down firmly. Leave a basin-like depression around the plant to facilitate absorption of water. **Do not make a hill**, as it compels the water to flow away from the plant. All evergreen plants need a mulch, which prevents evaporation of water in the soil. Peat moss is an excellent material for this purpose.

NOTE!

Our many years of experience in the nursery business enable us to give you valuable and practical information and service in selecting, planting and caring for plantings. It has always been our aim to furnish a superior quality of the best varieties of nursery stock and to maintain policies that make our customers of today our customers of tomorrow.
